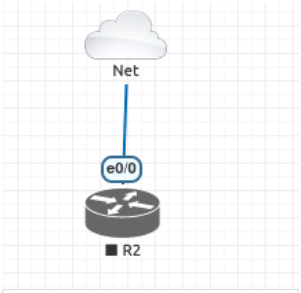
Router add ip dhcp

Wednesday, February 9, 2022 7:08 PM



Ligando no router

```
Router#
Router#
Router#conf t
Enter configuration commands, one
Router(config)#
```

Entrando na config global

```
Router#
Router#
Router#conf t
Enter configuration commands, one
Router(config)#
```

Entrando na interface

```
Switch(config)#inter
Switch(config)#inteface e0/1
```

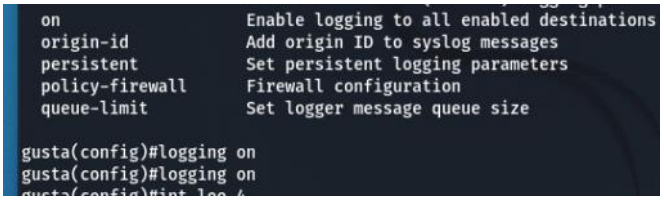
```
Router(config-if)#ip add dhcp
%Error opening tftp://255.255.255.255/router-confg (Timed out)
Router(config-if)#no shutdo
Router(config-if)#no shutdown in
Router(config-if)#no shutdown interface
*Feb  9 22:26:19.469: DHCP: No configured hostname - not including Hostname opti
on
Router(config-if)#no shutdown
Router(config-if)#inter
*Feb  9 22:26:23.873: %DHCP-6-ADDRESS_ASSIGN: Interface Ethernet0/0 assigned DHC
P address 192.168.0.101, mask 255.255.255.0, hostname

Router(config-if)#
```

```
Router(config-if)#do wr
Building configuration...
[OK]
Router(config-if)#
```

Salvar config (wr = write)

```
Router(config-if)#do wr
Building configuration...
[OK]
Router(config-if)#
```



Enable logging

Gerando log, basicamente eu criava interfaces loopback e dava no shutdown e depois rodava o shut e no shutdow novamente
