

# Conectar no radius

- (dmz) ← essa é a interface de rede

```
aaa-server EQUIPMENT protocol radius
exit
aaa-server EQUIPMENT (dmz) host 192.168.2.10
-> key 0 <senha> #isso no modo config-aaa-server-host
exit
aaa authentication ssh console EQUIPMENT LOCAL
aaa authentication serial console EQUIPMENT LOCAL
```

## Testando radius

```
test aaa authentication RADIUS host 192.168.2.10
```
